---

## Education

### State University of Informatics and Radioelectronics

Bachelor's degree, Systems Engineer

06/2017

### Minsk State Polytechnic College

Special Diploma, Electrician

06/2013

Was one of the best college students. Graduated with honors.

---

## Experience

### System Administrator

Belarus Interbank Settlement Center

01/2017 - Present

#### Responsibilities:

- Learned the basics of networking from senior system administrators, with demonstrations of how network automation is now preferred as part of continuous integration and continuous development (CI/CD).
- Integrated Linux and Windows Server system in production infrastructure.
- Support users on the working process.
- Made myself available 24/7 to handle IT ticket escalations received by email and phone.
- Set up a virtualization environment using Windows, Hyper-V and VMWare drivers.

- Support Active Directory and Group Policy environment.
- Use Zabbix to monitor the network and web servers.

Lerned DevOps practices and try integrated on work flow. Used Jenkins, Ansible, Docker and Kubernetes for test CI/CD pipeline on VMWare infrastructure.
